

## **SAFETY & LOSS CONTROL SPECIALIST I/II**

Denver Water is recruiting for an individual to fill a Safety & Loss Control Specialist I or II position. This individual will assist in the implementation and administration of a comprehensive loss control program, including investigation of safety and security incidences, documentation of injuries, property damage, public liability, and determining causes and preventive measures to avoid recurrences. Will be required to perform rotating on-call duty.

Minimum requirements for the I level are two years college or university coursework in safety and security engineering, business administration or a related field and two years' experience in industrial or plant loss control operations. An equivalent combination of education and experience may be considered.

Minimum requirements for the II level are Graduation from a four-year college or university with a major in industrial, security or safety engineering, business administration or related field and three years' responsible loss control experience including safety training, accident prevention, security system design and evaluation, claims adjusting and related risk management functions.

Both positions require a valid Class 'C' Colorado driver's license and a satisfactory driving record [four points or less in the past three years].

In order to be considered, applicants must complete in full, a Denver Water Application and submit it with a current motor vehicle record. Employment offers are contingent upon passing a drug screen, physical, background and reference checks. Applications will be accepted until a sufficient number are received. Please apply online at [www.denverwater.org](http://www.denverwater.org) or in person at:
